**CITY OF ARCADIA
PUBLIC WORKS SERVICES DEPARTMENT**

**WATER SERVICE
INSTALLATION GUIDELINES**

Below is a list of steps that need to be completed in order by the Developer/Owner/Builder/Representative for the installation of a new water service:

1. Complete a Water Meter Clearance Application for each unit if the development is equal to or less than five individual units. Complete a Water Meter Clearance Application for a common domestic water service if the development is more than five units. If the new water service includes a fire sprinkler system, approved fire sprinkler plans (including fire demand and the meter size required) must be included with the application.
2. City of Arcadia Public Works Services Department must determine proper size for the water service and meter prior to issuing an estimate letter, (by mail, fax or pick up) for all permit fees. Please note that quote is valid up to 365 calendar days from the date of the application. After expiration, you will need to reapply.
3. Make an appointment with Public Works Services Inspector, Mark Ornelas, at (626)254-2725 to spot the meter location and answer any questions pertaining to the job site.
4. Hire a general contractor with the proper licensing (Class A or C34) to perform the work. Have a copy of contractor's Arcadia Business License, State License and Certificate of Insurance naming the City of Arcadia, Public Works Services Department as additional insured.
5. Pay the City of Arcadia fees based on the estimate. Have contractor pick up all permits, and standard specifications, at least 24 hours in advance of scheduled work being performed.
6. Notify Underground Alert at least 48 hours in advance of scheduled work being performed. Notify the City of Arcadia at least 48 hours in advance of scheduled work being performed to setup inspection at (626)254-2725.
7. During service installation, an inspector from the Public Works Services Department will need to be present as required for the inspections.
8. If the existing service is adequate to meet the domestic and fire demand, the existing service must be in compliance with the current Water Standard Specification.
9. After Final Inspection, Permit must be signed off and complete. All deposits less accumulated costs to the City of Arcadia will be returned to the developer.
